Interference of International Countries in Domestic Matters

---

There is a highly relevant contender to this matter of Foreign Interference of International Countries in Domestic Matters, that is the United States of America. America has a long history of causing foreign interference and political instability, starting from the middle east, in 1953 where they initiated a coup to overthrow Prime Minister Mohammed Mossadegh and reinstated the Shah, Mohammad Reza Pahlavi, to protect Western oil interests. In 2003, USA invaded Iraq claiming they had weapons of mass destruction (which by the way, were never found) without lots of solid evidence. The US was also involved with the NATO-led interventions in the 2011 Libyan civil war, that led to the overthrow of Muammar Gaddafi causing lots of instability, along with that the U.S also intervened and caused the Vietnam war, how does USA advocate for that while spreading their usual propaganda message?
